**SORTING &
RECYCLING...**
a necessity
for combating
the depletion
of resources

IN ORDER TO BRING YOU LOCALISED SOLUTIONS, FOR YEARS WE HAVE BEEN BUILDING A REAL OPERATING DEVICE.

Fréjus is the nerve centre of this device. It is from Fréjus, within our three **Eco-Pôle Recyclage** that all the area's materials are prepared to go to the recycling chains. This operational device is complemented by external centres that we call **Eco-Relais**.

Located in the Var and the Alpes Maritimes areas, they allow you to benefit from a range of services responding to your waste sources and thus your needs.

Three circular callouts with logos and text:

- Top: **ECO-POLE Recyclage** DÉCHETS NON DANGEREUX
- Middle: **ECO-POLE Recyclage** DÉCHETS DANGEREUX
- Bottom: **ECO-POLE Recyclage** PEPS & MÉTALUX

Three circular callouts with logos and text:

- Top: **ECO-RELAIS** St-Jeannet
- Middle: **ECO-RELAIS** St Laurent du Var
- Bottom: **ECO-RELAIS** Drap

We collect!

Map labels for coastal cities: Bandol, Signes, Toulon, Brignoles, Pignans, Le Luc, Saint Tropez, Draguignan, Fréjus, Cannes, Antibes, Nice, MONACO.

COMMITMENT

MEANS HAVING BEEN A KEY PLAYER IN OUR REGION FOR MORE THAN A CENTURY AND DEVOTING OURSELVES TO ITS CONSERVATION.

An independent group rooted in the Var and Alpes Maritimes areas

The Sclavo Environnement Group offers solutions adapted to waste generated by construction, industries, companies, organisations, administrations, communities and individuals.

We ensure the dismantling, collection, sorting, and processing of hazardous and non-hazardous waste, as well as iron and metal.

By relying on high-performance equipment and integrated logistics, we guarantee constant reactivity and rigorous traceability. This recognised expertise in the Var and the Alpes-Maritimes areas allows us to guarantee solutions in line with the regulations in force and the needs of new recycling channels.

Strong values conveyed for 4 generations.

The adventure started in 1918 and continues today. Our family-owned and independent group, creator of permanent jobs that cannot be relocated, has a priority objective: to recycle all the waste which transits on our sites.

COMMITMENT MEANS OFFERING LOCAL SOLUTIONS THAT MEET YOUR NEEDS 100%

Giving waste a new lease of life through recycling, whether as energy or substance, is a powerful response to the depletion of resources. Our teams work in our 3 Eco-Pôle Recyclage (hazardous waste, non-hazardous waste, iron and metal) and our 4 Eco-Relais to achieve this goal on a daily basis. Faced with the depletion of natural resources and increasing consumption, the stakes are high.

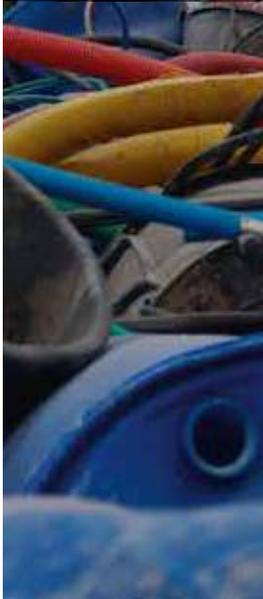

SOLUTIONS ADAPTED TO ALL TYPES OF WASTE

IRON & METAL: heavy scrap, plating, copper, brass, lead, zinc, aluminium, stainless steel...

NON-HAZARDOUS WASTE: bulky items, plaster, plastics, paper, cardboard, rubble, bricks, tiles, concrete, rocks, earth, plants, pallets, wood...

HAZARDOUS WASTE: bound asbestos, paint pots, mineral and vegetable oils, soiled rags, aerosols, WEEE, batteries, lamps, neon...

OUR SOLUTIONS

- Waste diagnosis
(non-hazardous waste, hazardous waste, inert waste...)
- Professional waste treatment centre
- Rental of skips and other containers
- Purchase of iron & metal
- Purchase of paper - cardboard - plastic
- Bound asbestos and fibre cement
- Eco-Site
- Eco-Workshop
- Nautical recycling
(Recycling of pleasure boats no longer used)
- Cutting & demolition
- Confidential destruction
of archives & customs seizures
- Training
- WEEE

COMMITMENT MEANS DEVELOPPING SYNERGY BETWEEN THE RESOURCES AND FACILITIES FOR COMPREHENSIVE WASTE MANAGEMENT.

A vehicle fleet and a fleet of suitable containers

To ensure logistic reactivity and respond effectively to each waste problem, the Sclavo Environnement Group has a complete fleet of vehicles and containers, suitable for collecting, transporting and storing all types of waste (hazardous waste, non-hazardous waste, iron and metal).

A synergy between the resources to provide quality

In the face of regulatory requirements and the need to control waste management costs, the men and women of the Sclavo Environnement Group work on a daily basis to implement innovative and efficient solutions, cost savings and environmental benefits.

High-performance sorting and recycling facilities

In the face of new types of waste emerging and with a view to achieving our 100% recycling objective, the Sclavo Environnement Group is acquiring state-of-the-art facilities enabling efficient sorting, contributing to the development of new treatment and recycling channels.

COMMITMENT MEANS ENSURING TOTAL TRACEABILITY

Rigorous traceability

All waste collected and sorted or transiting on our sites (incoming and outgoing) is specifically controlled to ensure their traceability and the regulatory compliance of our treatment and recycling channels.

COMMITMENT MEANS TAKING ACTION FOR THE ENVIRONMENT

A controlled environmental impact

Environmental conservation, safeguarding natural resources and reducing the ecological impact of our activities are at the heart of our projects. The Scavo Environnement Group integrates environmental issues into its development prospects and continuous improvement objectives.

Model facilities

As a guarantee of a sound, secure and compliant structure, our facilities meet current environmental standards.

COMMITMENT MEANS CREATING PERMANENT JOBS THAN CANNOT BE RELOCATED.

Human capital is the most important resource

Our Human Resources policy is based on 3 key points: permanent employment that cannot be relocated, personalised ongoing training and future prospects. With almost 100 employees spread across our various sites, Sclavo Environnement is a pluralistic group that believes in its human capital and in the commitment of each individual.

COMMITMENT MEANS FINDING CONCRETE ALTERNATIVES IMMEDIATELY.

Our commitment is **Circular**.

Regenerating essential resources for life and for our future is a commitment that is written in our DNA and has always been at the heart of our approach. By favouring treatment and recycling networks that are close geographically, and partners who are sensitive to the environmental and social cause, we draw the virtuous circle of a responsible and solidarity-based economy..

Our commitment is **Collaborative**.

Sclavo Environnement is proud to share the values of the national network of comprehensive waste management, PRAXY, of which it is a founding member. Understanding customer service, regulatory monitoring, synergy between its members, long-term relationships with its customers by combining proximity and reactivity, wage stability and professionalism. A special human relationship, that combines all these values with the strength of a national structure on a daily basis.

Réseau
PRAXY

Our commitment is **Local**.

Conveyed from generation to generation, the love of our land and the beauty of our coastline have made Sclavo Environnement a close partner of the PACA region's key players. Established throughout the region, we support their environmental issues on a daily basis, to preserve our common heritage and that of future generations.

Our commitment is **Responsible**.

As innovative and responsible professionals, we develop high-performance technologies to optimally dismantle, sort, collect and process waste following rigorous traceability. In 2007, we obtained ISO 14001 certification, proof of quality, safety and management which integrates the the environment in continuous improvement objectives. In 2017, the group's work was rewarded by obtaining ISO 9001 certification, a token of customer satisfaction on a daily basis.

The
Sclavo Environnement Group
is a member of

Recycling is everyone's **responsibility!**

National partner of comprehensive waste management industries, administrations, eco-organisations and companies, PRAXY provides local recycling solutions to meet national needs.

Thanks to a unique business model, PRAXY offers its customers the simplicity of a close relationship with a national interlocutor, combined with services provided by a network of regionally-based SMEs.

Connected to our regions and concerned with the balance of our ecosystems, our ambition is to offer increasingly efficient industrial recycling solutions to create the resources of tomorrow.
